UT7001W

Rfiver Universal Modern White TV Stand Legs, for 55"-90"

DESCRIPTION

Introducing the Tabletop TV Stand UT7001 a robust and versatile solution designed to enhance your television viewing experience. Crafted from high-quality alloy steel, this stand ensures stability and durability for TVs ranging from 55 to 90 inches.

FEATURES

Stable Design: Weighing 15.5 lbs, the UT7001 features strong tubing and heavy-duty one-piece welded legs, supporting TVs up to 150 lbs. A safety lock design prevents accidental falls, providing enhanced security.

Flexible Adjustable Poles: The adjustable distance between the poles allows the stand to accommodate various TV sizes. Position the poles closer for smaller TVs to save space, or further apart for larger screens to ensure optimal stability.

Height Adjustable: With four height settings ranging from 21.5" to 30.3", you can align your TV to your preferred viewing angle, reducing glare and improving comfort. The design also provides ample space beneath the TV for accessories like soundbars, gaming consoles, or cable boxes.

Wide TV Compatibility: Compatible with most 55" to 90" LCD/LED flat panel and curved screen TVs from brands such as Samsung, LG, TCL, Sony, and Hisense. Supports VESA mounting hole patterns from 200x200mm to 800x400mm.

Easy Assembly & Cable Management: The stand comes with a detailed instruction manual and all necessary tools and screws for straightforward assembly. An integrated cable management system keeps wires organized and out of sight, maintaining a clean and tidy appearance.
